

SUPPLY CHAIN AUDITING SERVICE

Supply chain executives: let us help you get your life back.

WHEN'S THE LAST TIME YOU HAD A WEEKEND TO YOURSELF?

You and your team have been soldiering through the pandemic, finding replacement drivers, available reefers, chassis, and alternative routes. By sheer force of will, you've kept your supply chains running in the face of this unprecedented chaos.

But there have been no breaks, and a few stumbles. And new regulations are coming. Your planner just quit. Management keeps asking for updates. You'd love to investigate potential failure points and efficiencies, but right now? You just have to get through today.

GET OUT IN FRONT. STAY OUT IN FRONT.

Let the supply chain analysts at Transparent Path help you get out in front of the work. Our objective, third-party audit of your supply chain operations can help you **JUSTIFY MUCH-NEEDED RESOURCES, TECHNOLOGIES AND WORKFLOW CHANGES.** We interview you, your team, your leadership, and your suppliers to identify operational and communications bottlenecks, problem suppliers, recurring pain points and potential ESG impacts in your operations.

From these interviews, we create a baseline report of the health of your logistics operations, and a set of **ACTIONABLE, REAL-WORLD RECOMMENDATIONS FOR MANAGEMENT** — including cost justifications. And we leave you with a measurement scorecard you can use on your own.

WE ARE YOUR CHAMPIONS

We act as your champions within the organization, reinforcing your voice and your needs with credible, objective, outside perspectives earned at places like Amazon, Star Market, PepsiCo and Earth Economics.

WHAT WE DELIVER

- ✓ A management-friendly overview of your operations & supply chain health.
- ✓ A review of existing and potential risks to revenue and reputation.
- ✓ Opportunities identified and recommendations made to improve performance and resilience.
- ✓ Recommendations on creating better business relationships and increased trust with supply chain partners.
- ✓ A framework to measure supply chain improvements in terms of ESG metrics.
